# SCAFCLAD™ Encapsulation Sheeting

Scafclad sheeting provides durable environmental protection, securely containing pollutants, dust, and hazardous materials in all conditions. Offered in heavy-duty and FlameX flame-retardant options, Scafclad FlameX is certified for safe use on scaffolding under Australian Standards.

The Original Scafclad,  
Proudly Ours Since 2003

Scan to learn  
more about  
Scafclad

## PRODUCT USES

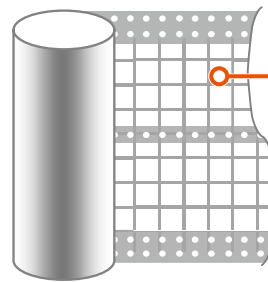

- ✓ Weather Protection & Climate Control
- ✓ Waterproofing & Temporary Shelters
- ✓ Dust & Particulate Control
- ✓ Paint Over-spray & Surface Protection
- ✓ Abrasive / Sand Blasting
- ✓ Asbestos & Lead Paint Removal
- ✓ Demolition Works

## PRODUCT FEATURES

- ✓ AS1576.7 Certified Options
- ✓ FlameX Fire Retardant Options
- ✓ UV Stabilised & Weather Resistant
- ✓ Ideal for Digital Printing & Branding
- ✓ Customisable to Suit Purpose of Use
- ✓ Custom Sizes to Suit Projects of Scale

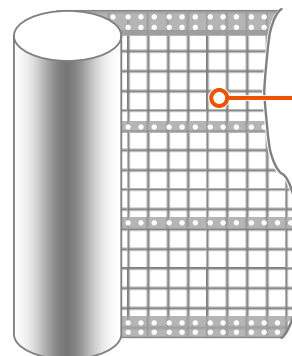

## Sealed Eyelets for Optimal Waterproofing

Each Scafclad roll includes reinforced eyelet bands along its full length, with eyelets positioned every 100mm. All eyelets are sealed until penetrated with fixing ties to secure sheeting during installation, ensuring containment is as waterproof as possible.

### 2m x 45m Scafclad™

Double rows run along the top and bottom edges, with a single row along the centre of the sheet.

### 4m x 45m Scafclad™

Double rows of eyelets run along the top and bottom edges, with single rows positioned 1.4m from each edge.

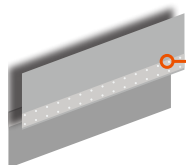

# Secure Your Site, Safeguard the Environment.

Scafclad Environmental Protection Containment keeps pollutants contained, safeguarding your project and the surrounding environment.

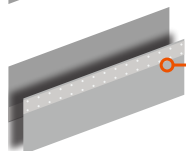

## Easy Installation, Trusted Tight Seal

Scafclad's overlapping sheets provide weather and dust proofing for optimal performance. Installation is easy with **Sitemax Elastic Fixing Ties**, featuring a pointed tip for quick setup and removal. These ties adjust tension with wind loads—staying slack in calm weather and tightening under pressure to reduce tearing, shock loading, and stress on eyelets, enhancing durability and safety in extreme conditions.

### Weather proofing

Upper sheets overlap lower sheets to prevent rain from entering contained site

### Dust proofing

Lower sheets overlap upper sheets to contain dust on site

### Strong Pointed Tips

Easily pierces through sealed eyelets for quick installation and removal

### Tension Elasticity

Elastic cord adjusts tension in windy conditions for optimal durability

# Customise Scafclad Containment For Your Next Project.

We supply everything needed to customise Scafclad containment for your project, ensuring durability, compliance, and easy installation.

## Digital Printing That Builds Your Brand

Our advanced digital printing customises Scafclad with any solid colour or branded design, delivering a high-quality finish that boosts brand visibility while maintaining effective environmental containment.

Scafclad meets both safety and branding goals by promoting a professional appearance and reinforcing brand identity on-site.

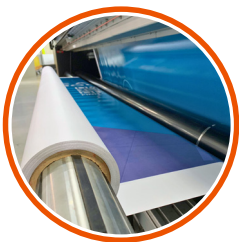

### Design Support

We custom-design Scafclad artwork to suit your project vision and maximise on-site brand exposure.

### Superior Print Quality

Scafclad offers high-resolution printing with UV stabilised inks for long-lasting vibrancy.

### Fast Turnaround

Scafclad is customised in-house and always in stock, keeping lead times short and dispatch fast.

# Sets The Standard For Safety Compliance.

## Flame Retardant & AS1576.7 Certified

FlameX fire retardant products exceed Australian Industry Standards, ensuring top-tier safety and compliance across a wide range of applications.

All Scafclad products are rigorously tested to meet key safety standards, including AS1530.2 and AS1576.7, which require a flammability index of 25 or lower. As shown in Figure 1, Scafclad FlameX products achieve a flammability rating of 1, ensuring they are safe for scaffolding use.

Scafclad FlameX is approved for non-structural applications and, when paired with custom Sitemax Scaffmesh™ chainwire, meets all state, territory, and national structural safety standards.

Scafclad Super FlameX, the newest addition to our range, exceeds Queensland's burst pressure requirements and meets all Australian safety standards, offering superior protection and peace of mind.

Download our data sheets online or request a copy of our comprehensive testing reports by contacting our team on 1800 007 557 or emailing [sales@sitemax.com.au](mailto:sales@sitemax.com.au).

### FLAMMABILITY INDEX RATING

# SHRINKCLAD™ Shrink Wrap

Shrinkclad Shrink Wrap is a UV-stabilised polymer film that shrinks under heat for a seamless fit on scaffolding. Available in various sizes and FlameX fire-retardant options, it provides 100% sealed, safe, and secure containment that can be customised to suit project specifications.

## 100% Sealed, Safe & Secure.

Scan to Learn  
More About  
Shrinkclad

### PRODUCT USES

- ✓ 100% Sealed & Secure Containment
- ✓ Weather Protection & Climate Control
- ✓ Water Proofing
- ✓ Dust & Particulate Control
- ✓ Paint Over-spray & Surface Protection
- ✓ Abrasive / Sand Blasting
- ✓ Asbestos & Lead Paint Removal
- ✓ Demolition Works
- ✓ Packaging Wrap for Secure Transportation

### PRODUCT FEATURES

- ✓ AS1576.7 Certified Options
- ✓ FlameX Fire Retardant Options
- ✓ UV Stabilised & Weather Resistant
- ✓ Customisable to Suit Purpose of Use
- ✓ Custom Lengths to Suit Projects of Scale
- ✓ Available in Jumbo Rolls

## Everything You Need From One Supplier.

We supply everything you need to guarantee a successful Shrinkclad Installation, from zipper windows and doors, to heat tools and tape, we've got you covered.

# Customise Without Compromise.

We provide everything required for on-site Shrinkclad installation, enabling workers to efficiently manage the process and customise containment solutions to their needs. In addition, we offer **Shrinkclad Installation Training** to ensure your team knows how to effectively use the tools and products for a seamless, successful installation every time.

## Effortless Handling For Efficient Installation.

Simplify handling jumbo Shrinkclad rolls with our custom Jumbo Roll Dispenser (SCW108), designed to streamline unrolling and re-rolling jumbo rolls during installation for effortless workflow and efficiency.

### Heavy Duty Zipper Windows & Doors

Manufactured in-house by our dedicated team for the highest quality and performance guaranteed

### Serrated Edge ShrinkTape

Easy to tear and available in three different sizes for faster installation

SCW400W | 1m x 2m White Zipper Door

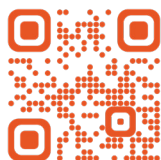

SCW400C | 1m x 1m Clear Zipper Window

## Flame Retardant & AS1576.7 Certified

Shrinkclad FlameX products are fully certified to AS1576.7 standards, ensuring they meet stringent Australian safety requirements for non-structural scaffolding applications. These products provide dependable containment while offering the confidence and peace of mind needed for your project.

## Master Your Shrinkclad Installation Skills With Expert Training.

We provide on-site training across Australia to ensure your team has the skills needed for flawless Shrinkclad installations. Our experienced trainers deliver practical, hands-on guidance, helping your crew master everything from material handling to precise application.

Contact our team or scan the QR Code to submit your booking request for Shrinkclad Installation Training today.

### ON-SITE HALF DAY TRAINING

**\$3,600\*^**

\*Price includes travel costs for Brisbane or Sydney metro areas.

^Price excludes additional travel/accommodation costs which may be incurred for training required outside Brisbane or Sydney metro areas.

### TRAINING BENEFITS

- ✓ On-site Training Provided Australia-wide
- ✓ Develops Practical Skills
- ✓ Improves Installation Efficiency
- ✓ Training Is Tailored To Suit Project Needs
- ✓ Empowers Teams To Tackle Any Project
- ✓ Improves Installation Precision & Quality
- ✓ Improves Technique for Flawless Results

# We Tailor Tuffclad To Take On Any Project, No Matter How Tough.

We customise all Tuffclad containment products in-house, producing unique solutions for complex structures and sail tracking systems of any kind. From tarpaulins and curtains to keder roofing and enclosures with doors or windows, Tuffclad can be tailored to meet the unique needs of any project.

## Keder Edging

Double-flap sandwich welded keder edging fits various sail track systems and enhances durability.

## Pulley Systems

Rope pulley systems create easy to open and close curtain access on large enclosures.

## Custom Windows

Clear vinyl zipper windows can be opened or closed for ventilation and provide greater visibility for safety.

## Custom Doors

Zipper doors provide enclosure access and can be customised with clear vinyl windows for safety.

# TUFFCLAD™ Sonic Quilts

Tuffclad acoustic and sonic quilts effectively absorb and block noise from construction and demolition activities. They provide reliable noise control and can be securely attached to a variety of structures, including temporary fences, scaffolding, hoarding, and other frameworks.

## PRODUCT USES

- ✓ Sound Absorption & Blocking
- ✓ Occupied / High Pedestrian Areas
- ✓ Night Works & Public Works
- ✓ Generators & Plant
- ✓ Works in Occupied Facilities
- ✓ Noise Reflection Control
- ✓ EPA Noise Restrictive Areas
- ✓ Abrasive / Sand Blasting
- ✓ High-pressure Water Blasting

## PRODUCT FEATURES

- ✓ Ideal for Digital Printing & Branding
- ✓ Available in All Tuffclad Colours
- ✓ Blocks Up To 21db
- ✓ NATA Tested & Certified Acoustic Rating
- ✓ Flame Retardant & AS1530.2 Certified
- ✓ Suitable for Vertical & Horizontal Install
- ✓ Weatherproof
- ✓ Light Weight at 2.7kg per/m<sup>2</sup>
- ✓ Easy to Manoeuvre & Install
- ✓ Suitable for Various Fixing Methods

Tuffclad Acoustic Panels Secured To Scaffolding

Tuffclad Sonic Quilt Secured to Temp Fencing

Tuffclad Printed Sonic Quilts Secured to Shrinkclad Containment

more about  
Siteclad

## PRODUCT USES

- ✓ Debris Containment
- ✓ Dust & Paint Over-spray
- ✓ Abrasive Blasting
- ✓ Privacy Screening
- ✓ Boundary Demarcation & Temp Fencing
- ✓ Wind Reduction
- ✓ Custom Tarpaulins
- ✓ Non-Structural Applications

## PRODUCT FEATURES

- ✓ AS1576.7 Certified Options
- ✓ FlameX Fire Retardant Options
- ✓ UV Stabilised for Durability
- ✓ Extensive Colour Range
- ✓ Custom Sizes to Suit Projects of Scale
- ✓ Customisable with Vinyl Edging & Eyelets
- ✓ 10 Year Pro-rata Warranty

## Strengthen Siteclad With Vinyl Edging

Siteclad shade cloth can be customised with a 50mm vinyl edge for added strength, creating durable custom tarpaulins for any project. Heavy-duty, UV-stabilised plastic eyelets spaced 600mm apart resist rusting and ensure installation is quick and easy, providing reliable coverage when you need it most.

# Safety Compliance You Can Count On.

## Flame Retardant & AS1576.7 Certified

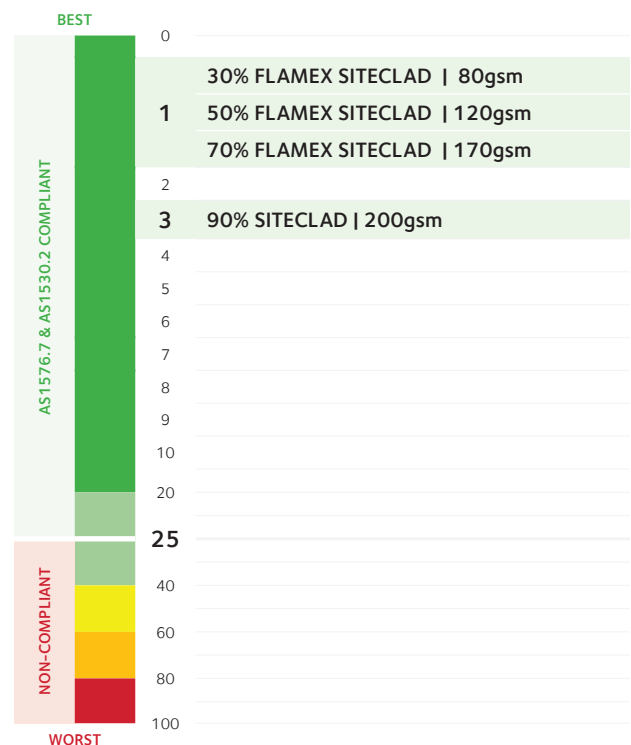

FlameX Siteclad shade cloth meets AS1576.7 standards, ensuring compliance with Australian safety requirements for non-structural applications. For structural applications, Scaffmesh™ combines Siteclad shade cloth and premium chainwire to deliver AS1576.7 certified scaffold containment which complies with all state, territory and national safety standards.

Please note, Scaffmesh with 30% Siteclad shade cloth is not suitable for use on scaffolding in Queensland.

# Siteclad™ Quad Net

Siteclad Quad Net is a high-performance containment solution designed for high-wind areas. Its 9mm aperture design maximises wind flow, improving stability and reducing the need for extra wall ties. This enhances safety and stability for construction sites facing challenging wind conditions.

**Maximum Wind Flow,  
Minimised Risk.**

Quad Net

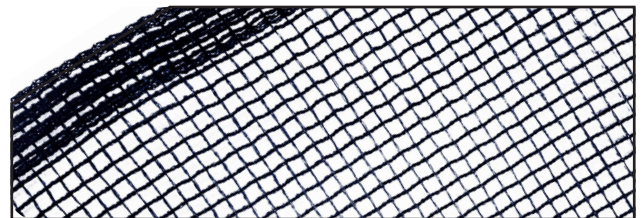

## PRODUCT USES

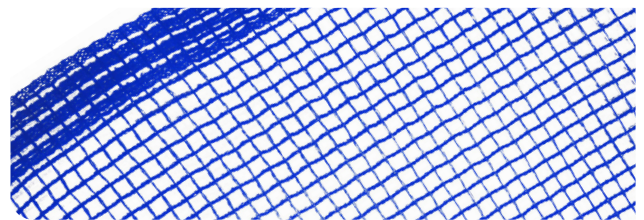

- ✓ Scaffold Containment in High-Wind Areas
- ✓ Debris Containment
- ✓ On-Roof Edge Protection
- ✓ Non-Structural Applications

## PRODUCT FEATURES

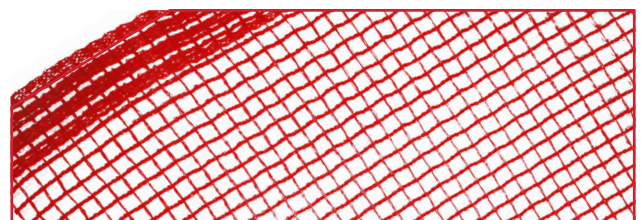

- ✓ AS1576.7 Certified
- ✓ FlameX Fire Retardant
- ✓ UV Stabilised for Durability
- ✓ 9mm Apertures for Reduced Wind-loading
- ✓ 25mm Double Woven Bands for Durability
- ✓ Custom Sizes to Suit Projects of Scale
- ✓ 10 Year Pro-rata Warranty

## Wind Load Reduction On Scaffolding<sup>1</sup>

### Quad Net Outperformed In Wind-Tunnel Testing

Siteclad Quad Net is the ultimate containment solution for construction sites in high-wind areas. Engineered for resilience, it has been rigorously wind-tunnel tested, achieving a 55% reduction in wind loading compared to other composite mesh products<sup>1</sup>.

This superior performance ensures safety and stability for structures, equipment, and personnel in challenging conditions, making Quad Net a dependable choice for maintaining site integrity and meeting compliance standards, even in the most demanding environments.

#### 9mm Apertures

Large apertures allow greater wind flow, effectively reducing wind load on scaffolding.

#### CONSOLIDATED WIND LOAD TEST RESULTS

### FLAMEX SITECLAD QUAD NET | 150gsm

I have been designing scaffold systems for over 26 years and have never had specific data on wind performance for cladding. Now, thanks to Sitemax, I can access reliable wind performance data for all the scaffold cladding products they test and supply.

Notably, Sitemax's Spidermesh is a standout. When combined with Siteclad Quad Net, Spidermesh provides a lightweight cladding system with substantially reduced wind drag that complies with Workplace Health and Safety (WHS) regulations for allowable aperture size. Since learning about **Spidermesh with Siteclad Quad Net**, I have specified this product for use as it complies with WHS standards and dramatically increases scaffold safety, stability, and reliability, especially for scaffold structures erected in wind-affected areas.

# SPIDERMESH™

Spidermesh is a patented containment mesh manufactured from recycled Australian steel for durability and easy installation. Its sealed-edge design prevents tangling, ensuring smooth handling that saves time on-site. Fully customisable in size, colour, and grade, Spidermesh meets all Australian standards.

## Containment Beyond Compliance.

more about  
Spidermesh

### PRODUCT USES

- ✓ Structural Dust & Debris Containment
- ✓ Structural Applications
- ✓ Structural Dust Containment with Scafclad
- ✓ Structural Paint Containment with Scafclad
- ✓ Quad Net Lining For High-Wind Areas

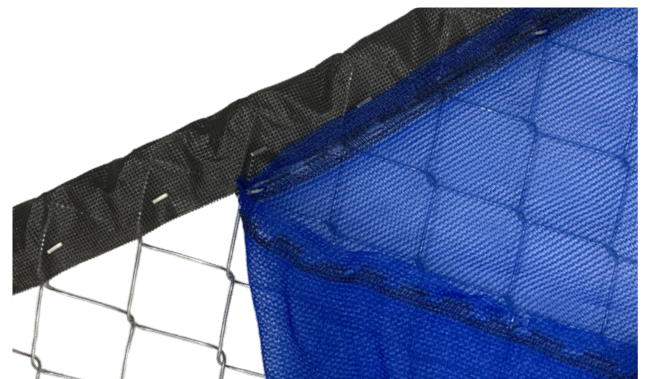

### PRODUCT FEATURES

- ✓ AS1576.7 Certified
- ✓ FlameX Fire Retardant
- ✓ Patented Tangle-Free Design For Easy Installs
- ✓ In-House Digital Print Options for Site Branding
- ✓ All Linings UV Stabilised for Longevity
- ✓ Reusable Chainwire & Replaceable Linings
- ✓ HT Chainwire Manufactured By Sitemax
- ✓ Chainwire Made From Recycled Australian Steel
- ✓ 10 Year Pro-rata Warranty on Siteclad Linings

## Simple Innovation That Saves You Time & Money

Spidermesh chainwire is sealed across the top and bottom edge of each roll using a UV stabilised banner mesh material. This patented design prevents tangling to ensure on-site installation is easy and efficient. Spidermesh lining is also replaceable, allowing chainwire to be reused time and time again across projects.

# Safety Compliance You Can Count On.

## Flame Retardant & AS1576.7 Certified

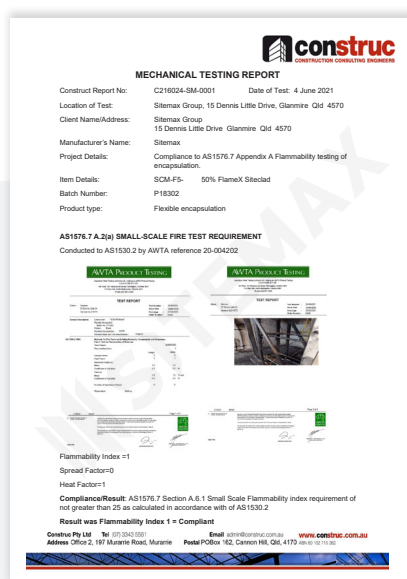

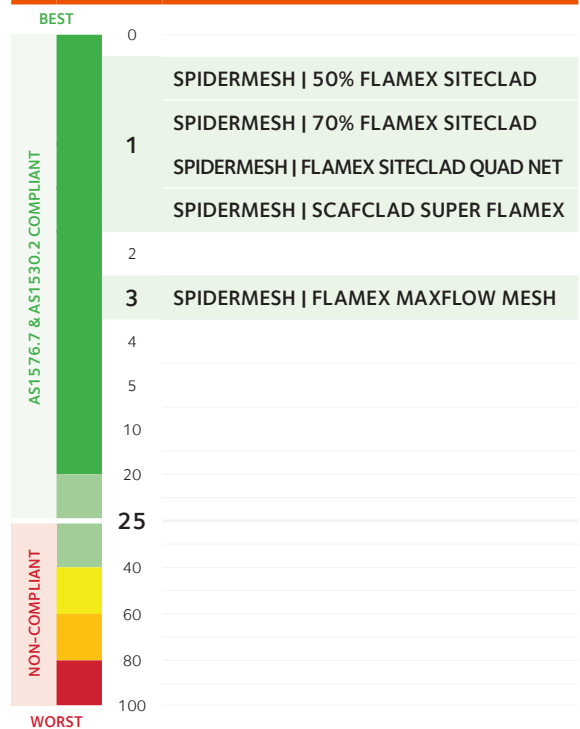

All Spidermesh containment mesh and FlameX lining options are engineered to meet and exceed the rigorous requirements of AS1576.7 standards. This ensures full compliance with Australian safety regulations for structural applications, providing a dependable solution for certified scaffold containment.

Spidermesh FlameX products adhere to AS1576.7 standards and meet all state, territory, and national safety requirements, making Spidermesh a trusted choice for projects where safety and reliability are paramount.

# Spidermesh Sustainability

## Reusable, Recyclable, and Made In Australia

We demonstrate our commitment to sustainability and quality by using recycled Australian steel for all high-tensile Spidermesh and Scaffmesh chainwire produced at our manufacturing facility in Australia. Our approach supports local industries, reduces emissions, and delivers strong, reliable containment materials that our customers trust.

Designed for reuse, Spidermesh is cost-effective and eco-friendly, withstanding multiple uses before shadecloth linings require replacement. At the end of its life, both Spidermesh and Scaffmesh chainwire can be recycled, offering an eco-friendly solution that helps our customers reach their Environmental, Social and Governance (ESG) targets.

Spidermesh Chainwire Manufacturing by Sitemax

Spidermesh with 50% FlameX Siteclad Shade Cloth

“

We were initially skeptical about Spidermesh, as it resembled traditional chain and shade, but the results exceeded our expectations.

The simple innovation of securing the top and bottom of the chain seemed too simple to make a difference, but in practice it prevented the rolls from tangling and made them easier to roll up. **We've been able to get 4-5 uses out of a Spidermesh roll before needing to replace the shadecloth lining, so it's cost-effective because the chain stays intact for longer and is much easier to handle.**

Spidermesh provides reassurance too as it's fire-rated and compliant with all standards – it's also durable against other trades, and it looks great!

Adam Young

more about  
Scaffmesh

## PRODUCT USES

- ✓ Structural Dust & Debris Containment
- ✓ Structural Applications
- ✓ Structural Dust Containment with Scafclad
- ✓ Structural Paint Containment with Scafclad
- ✓ Quad Net Lining For High-Wind Areas

## PRODUCT FEATURES

- ✓ AS1576.7 Certified
- ✓ FlameX Fire Retardant
- ✓ In-House Digital Print Options for Site Branding
- ✓ All Linings UV Stabilised for Longevity
- ✓ HT Chainwire Manufactured By Sitemax
- ✓ Made From Galvanised Recycled Australian Steel
- ✓ 10 Year Pro-rata Warranty on Siteclad Linings

## Quality & Compliance You Can Count On.

### QLD & NATIONAL SAFETY COMPLIANCE

All **High Tensile (HT) Scaffmesh** chainwire is made from galvanised recycled Australian steel at our manufacturing facility in Queensland. FlameX fire-retardant and AS1576.7 certified, HT Scaffmesh chain and shade products exceed burst pressure standards in Section 315D of the QLD WHS Act 2011 and comply with all relevant state, territory and national safety regulations.

### NSW SAFETY COMPLIANCE

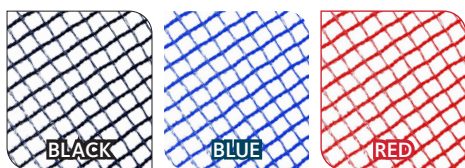

**Scaffmesh** chain and shade products are FlameX fire retardant and AS1576.7 certified in compliance with SafeWork NSW state health and safety regulations.

# Customise Scaffmesh Lining To Suit Your Project Requirements.

Our extensive range of Scaffmesh chainwire and linings can be customised to suit your project needs, whether you require structural cladding for environmental protection, debris containment in high-wind areas, or printed mesh to build your brand – we've got your project covered.

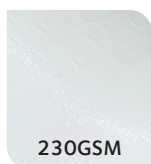

## FLAMEX SITECLAD QUAD NET LINING | HIGH-WIND AREAS

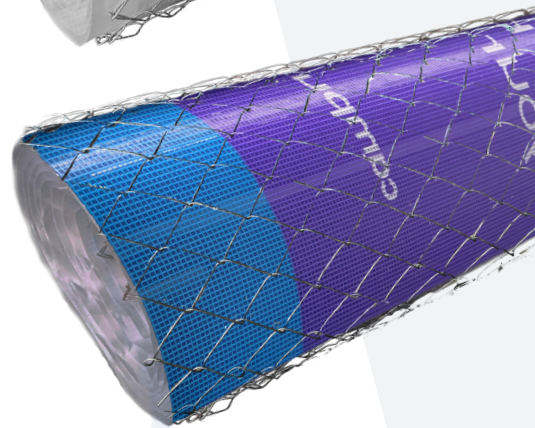

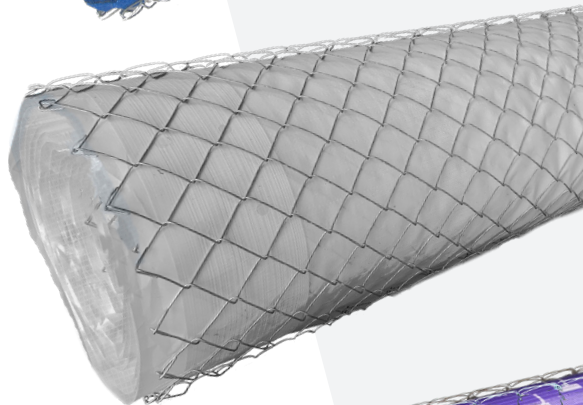

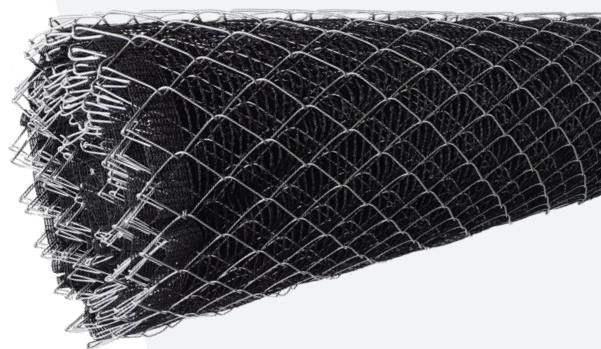

## 30%, 50% OR 70% FLAMEX SITECLAD LINING | CONTAINMENT

## FLAMEX SCAFCLAD SUPER LINING | ENVIRONMENTAL PROTECTION

## FLAMEX BANNER MESH CUSTOM PRINTED LINING | SITE BRANDING

# Safety Beyond Compliance.

## Flame Retardant & AS1576.7 Certified

All Scaffmesh containment mesh and FlameX lining options are AS1576.7 certified for safe use on scaffolding and structural applications nationwide.

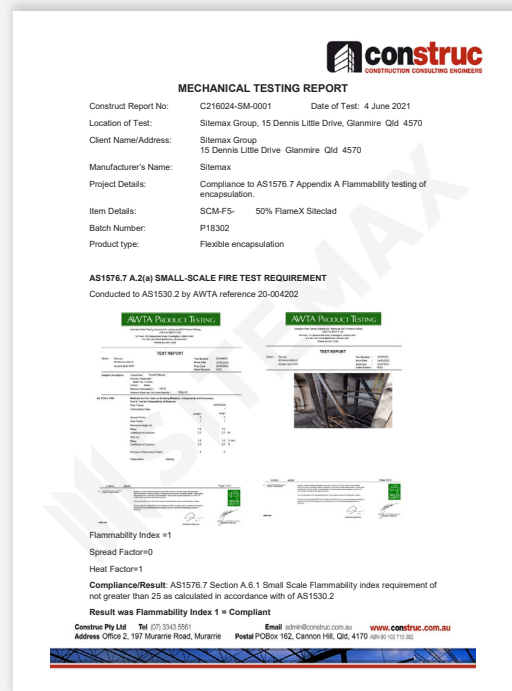

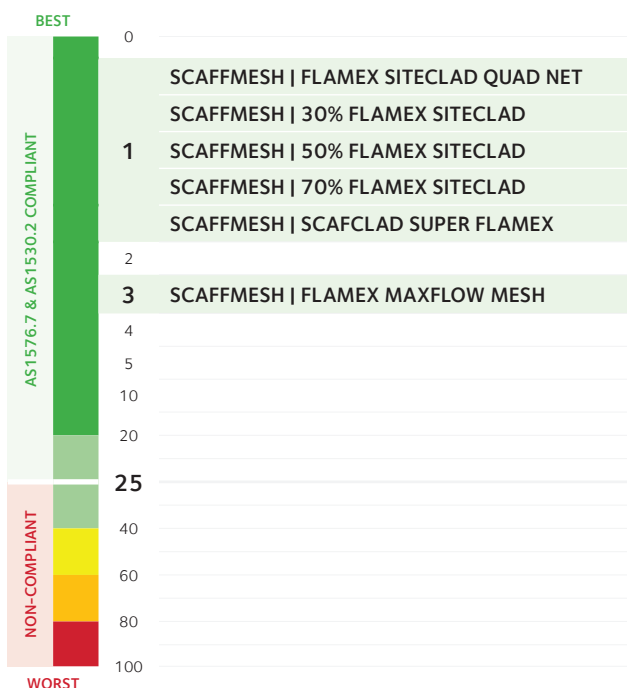

All High Tensile (HT) Premium Scaffmesh FlameX chainwire and linings exceed QLD WHS bursting pressure requirements and can be used nationwide.

All Premium and Standard Scaffmesh FlameX chainwire and linings comply with SafeWork NSW safety regulations and are suitable for use in NSW only.

- ✓ Australian Made From Recycled Steel
- ✓ UV Stabilised & Rust Resistant
- ✓ Patented Design | 2021105460

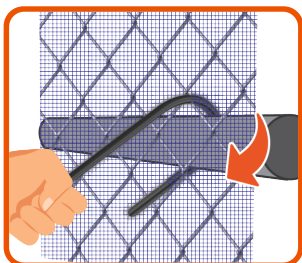

Scan to learn  
more about  
J-Hooks

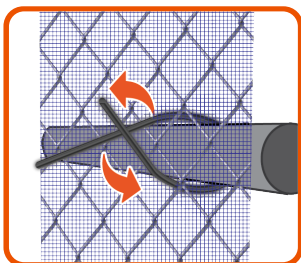

### STEP 1

Poke the short tail of the J-Hook through containment mesh, ensuring it goes over the top side of the scaffold ledger.

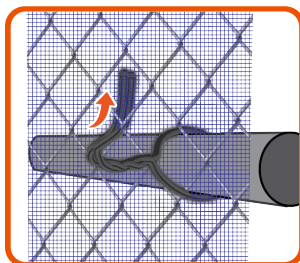

### STEP 2

Holding the long tail of the J-Hook, maneuver the short tail around scaffold ledger and push its end point back through the mesh on the underside of the ledger.

### STEP 3

Cross short and long tails of the J-Hook over each other and twist together three times, completing 1.5 full revolutions to tighten and secure mesh to scaffold ledger.

### STEP 4

Push tail ends of the J-Hook back through the mesh and above the scaffold ledger, securing in place to prevent exposed wires from causing potential injury.

# GRIPCLAD Ground Cover Protection

Gripclad reusable matting offers reliable ground cover and gridmesh protection, reducing hazards from dropped objects while providing a secure, non-slip surface for workers at any height. Easy to install, Gripclad products provide a safer, cost-effective alternative to traditional shade cloth for ground protection. Gripclad Geofabric is also available for ground and soil protection.

## GRIPCLAD PVC COATED GROUND COVER

- ✓ Ground Cover & Gridmesh Protection
- ✓ AS1530.3 Certified & Flame Retardant
- ✓ HD Ripstop PVC Coated Polyester Material
- ✓ Safe Non-Slip Surface

## GRIPCLAD LLDPE GROUND COVER

- ✓ Ground Cover & Gridmesh Protection
- ✓ Flame Retardant & Waterproof
- ✓ Surface Protection
- ✓ Single-sided Non-Slip Textured Finish

## GRIPCLAD GEOFABRIC

- ✓ Ground/Soil Protection
- ✓ Surface Protection

# Composite Mesh

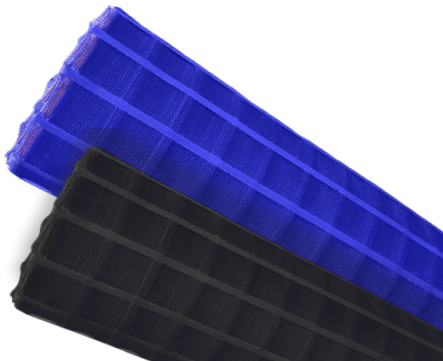

We offer a range of composite mesh products reinforced with polyester, fiberglass, or steel strands for added strength and flexibility. Suitable for various construction and industrial applications, composite mesh can be used for scaffold containment, roof handrails, erosion control, as a protective covering or site barrier.

## ENVIROSIGN

## Recyclable Signs To Support ESG Targets.

Proudly made in Australia from **100% recyclable** corflute, polypropylene, aluminium, and galvanised steel, our rigid EnviroSigns are UV-stabilised for durability and printed with eco-friendly water-based latex ink. At project end, we ensure responsible disposal with sign removal and recycling services, helping companies reduce their environmental impact, advance sustainability goals, and strengthen their reputation as responsible organisations.

## Backed By Certifications You Can Trust.

EnviroSigns are printed on HP industrial printers using eco-friendly, UL ECOLOGO® and GREENGUARD GOLD certified water-based latex inks, ensuring compliance with strict health and safety standards while creating a safer working environment.

## Keep safety in sight.

Safety signs should be sized based on distance, obstructions, and lighting to ensure readability, with larger signs needed as the distance from the viewpoint increases, as shown in Figure 1.

Figure 1 - Recommended sign sizes based on line of sight distance from eye, adapted from AS1319-1994<sup>1</sup>
