

Fencing Construction.

Sitemax supplies and installs a variety of fencing options for construction and development sites, offering solutions that cater to evolving project requirements, safety regulations, and budgetary constraints. This includes fully engineered steel fencing for long term projects, semi-permanent fencing, or ground-penetrating temporary fencing. Email all fencing enquiries to sales@sitemax.com.au or call our Customer Happiness Team on 1800 007 557.

QBCC LICENCE: 15391717

Fully Engineered Steel Fencing

- ✓ Ideal for long-term projects and fencing required near high traffic or high risk areas
- ✓ Posts concreted with extra large footing, size adjusted depending on wind rating
- ✓ Chain wire made from recycled and recyclable Australian steel
- ✓ Engineered to AS1170 wind-loading Australian Standards for structures
- ✓ Engineered fencing required where height exceeds 2m
- ✓ Engineering sign-off upon completion available

Semi-Permanent Fencing

- ✓ Ideal for short to medium-term projects
- ✓ Kopper log or 40nb steel post concreted in place
- ✓ Chain wire made from recycled and recyclable Australian steel
- ✓ Exceeds and outperforms AS4687 Australian Standards for temporary fencing
- ✓ Suitable for fences under 2m high

Ground Penetrating Temporary Fencing

- ✓ Ideal for short-term projects and low-wind areas
- ✓ 40nb ground-driven steel post with H bracing where required
- ✓ Chain wire made from recycled and recyclable Australian steel
- ✓ Suitable for fences under 2m high
- ✓ Quick and easy to remove
- ✓ Cost-effective fencing solution
